Summary

Motivated aspiring **Data Engineer** with hands-on experience & learning in **data analysis, SQL, Python**, and building scalable data solutions, combined with prior professional experience in **digital marketing**. Strong background in **analytics, campaign performance tracking**, and transforming data into actionable insights. Seeking a **Data Engineering Internship** to apply technical skills, business understanding, and problem-solving abilities in a growth-oriented environment.

Skills

- **Programming:** Python, SQL
- **Data Engineering:** ETL Pipelines, Data Warehousing, Data Modeling.
- **Big Data:** Apache Spark, PySpark
- **Cloud:** AWS & Services
- **Databases:** MySQL.
- **Tools:** Git, GitHub, Jenkins, CI/CD, Visual Studio IDE
- **Visualization:** Tableau, Power BI, Matplotlib, Seaborn

Experience

Media Mint

June 2023 - July 2024

Associate Digital marketer

- Managed **end-to-end digital marketing campaigns** for premium client accounts including **Netflix** and **Samsung**, ensuring alignment with **brand goals** and campaign objectives.
- Planned, executed, and optimized **paid media campaigns** across platforms such as **Google Ads, Meta Ads, YouTube, and Display Networks** to maximize **ROI**.
- Monitored **campaign performance** using analytics tools, prepared detailed reports, and provided actionable insights to improve **engagement** and **conversions**.
- Coordinated with **internal teams**, creative designers, and client stakeholders to deliver timely **campaign launches** and high-quality marketing assets.
- Conducted **audience research, competitor analysis, and keyword planning** to strengthen targeting strategies and campaign effectiveness.
- Managed **budget allocation, bid strategies**, and daily performance tracking to maintain **cost efficiency** and achieve **KPIs**.
- Supported **brand visibility** and **customer acquisition** initiatives through **data-driven strategies, A/B testing**, and continuous optimization.

Projects

Technology and Gadget Recommendation System

- Developed recommendation engine using Neo4j graph database.
- Applied machine learning models to improve recommendations.
- Used Python, Pandas, NumPy, and Scikit-learn.

Enterprise HR Portal

- Developed secure HR portal with AWS S3 integration.
- Implemented CI/CD using Jenkins and GitHub.
- Improved security with SSL/TLS encryption.

Education

Karunya Institute of Technology and Sciences
Master's in Data Science,

Aug 2025 – Present

KL University
Bachelors of Computer Applications, GPA: 9.11

Aug 2020 – May 2023

Certifications & Other Experience

- Unschool Intern
- VS Techworld Intern
- Zoho Certification
- Python Boot Camp
- AWS Cloud Computing
- Cyber Security
- Python Web Development.
